DMN700O-22

MCP ORANGE, Free Contact, Flush Mount w/ Resettable Element

General

The DMN700O-22 is a resettable orange manual call point for flush mount applications. It offers a single pole, changeover contact with common, normally open and normally closed connections. It is supplied with a key. Surface mount applications require the addition of the DM788O.

Installation

Installation time and ultimately cost, are of paramount importance. The MCP range directly reflects this need by providing a unique 'plug and play' concept designed specifically to reduce installation time. It utilises a special terminal block, where all initial installation cabling is terminated. This terminal block is then simply connected to the back of the MCP. Simple, but effective, with no re-termination required and no time wasted.

Flexibility

Through new standards and legislation, both break glass and re-settable operating elements may now be used. To provide the greatest 'flex-ability', the new MCP range can be configured as either a break glass or re-settable unit by simply changing from one element to another. No other additional parts or alternative products are required.

Standard Features

*   Enhanced aesthetics
*   Easy to install (plug and play)
*   Surface mount options
*   Key test facility
*   May be used with glass or resettable element
*   Easy to replace glass
*   High quality micro switch

DMN700O-22

MCP ORANGE, Free Contact, Flush Mount w/ Resettable Element

Specifications

Cable Termination	0.5 - 2.5 mm²
Max. contact rating (resistive load)	2A @ 30 VDC
Mechanical	
Material	PC/ABS
Weight	110g
Dimensions (W x H x D)	90 x 90 x 30
Colour	Orange
Environmental	
Operating temperature	-10°C to +55°C
Storage temperature	-10°C to +55°C
Relative humidity (non-condensing)	0-95%
IP Rating	IP24D
